MENNEKES

Product advantages

MENNEKES Elektrotechnik GmbH & Co. KG is a leading manufacturer of industrial plugs and sockets and also a provider of automotive and electromobility solutions.

Founded in 1935, the company has subsidiaries and representations in more than 90 countries. Two thirds of the employees work in the headquarters in Kirchhundem and the production facilities in Neudorf, Germany. MENNEKES attaches particular importance to the manufacturing quality and safety of its products. In the field of electromobility, the product range of the family-owned company includes technically mature and practical wallboxes, smart and ready-to-connect charging stations, vehicle plugs and charging cables as well as billing solutions. The best-known product, the MENNEKES plug "Type 2", is the standard charging plug for electric vehicles in Europe.
